After Click on generate – testcases got generated

The screenshot displays a web application interface for generating test cases. On the left, a form for a user story is shown with the following details:

- 25 user stories loaded.**
- Story Title ***: SCRUM-25: Employee Profile Employee Self
- Description**: As a user, I want to employee profile employee self so that the related functionality works as expected.
- Acceptance Criteria ***: As a user, I want to employee profile employee self so that the related functionality works as expected.
- Additional Info**: Any additional information (optional)...
- Generate Test Cases** button.

On the right, a list of generated test cases is displayed:

TC ID	Test Case Description	Category	Expected Result
TC-007	Edit profile with special characters in name fields	Edge	Profile saves successfully and the special characters are preserved and displayed
TC-008	Unauthorized user attempts to access another employee's profile via URL manipulation	Authorization	Access is denied and the system redirects to an error page or shows 'You are not authorized to view this profile'
TC-009	Session timeout while editing profile	Authorization	User is redirected to the login page with a message 'Your session has expired. Please log in again.'
TC-010	Profile page load time under normal network conditions	Non-Functional	Profile page loads and renders within 2 seconds
TC-011	Concurrent edit conflict handling	Edge	Second save detects a conflict and shows a message 'The profile has been updated by another session. Please reload and try again.'
TC-012	Accessibility check for profile edit form	Non-Functional	All interactive elements receive focus in a logical order, focus indicators are visible, and screen reader announces each field label correctly
